Anaconda Standard.The distance from Gibraltar to Ma-  
nila by way of the Suez canal, says the  
New York Tribune, is 8,554 miles; that  
from Gibraltar to Port Said, 1,829  
miles; through the canal, 99 miles; from  
Suez to Aden, 1,319; from Aden to Co-  
lombia, 2,136; from Colombo to Singa-  
pore, 1,560; from Singapore to Manila,  
1,455. It must, however, be remembered  
that the passage of the Suez canal,  
though short in distance—29 miles—  
takes a considerable time, as it must  
be made very slowly. The canal, by a  
convention signed Oct. 25, 1858, is ex-  
empted from blockade, and vessels of  
all nations, whether armed or not, are  
to be allowed to pass through it in  
peace or war. The distance to Manila  
from San Francisco is 7,659 miles; thus,  
from San Francisco to Honolulu, 2,083  
miles; from Honolulu to Manila, 4,961.  
This shows a difference in favor of the  
passage from San Francisco of 1,904  
miles.

## NOW FOR AN AGGRESSIVE WAR.

It will be welcome news to the whole  
country that President McKinley has  
determined to abandon the peaceful  
blockade idea, and that orders have  
been issued to the commanders of the  
blockading squadron which will give  
him a free hand in the matter of bom-  
barding all fortifications where resist-  
ance is offered. This means the in-  
auguration of a vigorous war policy,  
one that will bring decisive results in a  
comparatively short time.The war was undertaken for the pur-  
pose of freeing Cuba and relieving it  
of Spanish domination. There has been  
a quiet, peaceful blockade of Havana  
and one or two small expeditions have  
been sent on the island, and that is the  
extent of operations in Cuba. It is  
true that the government has not been  
prepared to land any considerable  
number of troops in Cuba, one reason  
being that there were no troops to  
land, outside of the regulars. But now,  
with regulars and volunteers, 100,000  
troops are ready to move at a moment's  
notice, and transportation for about  
half that number has been arranged.For there should not be any further  
delay in entering upon a vigorous cam-  
paign in Cuba. There is no reason to  
believe there are as many Spanish  
troops and volunteers in the island as  
reported, though it would be unwise to  
underestimate either their number or  
efficiency. One hundred thousand Ameri-  
can troops in Cuba, backed up by the  
American fleet, means that Spanish au-  
thority over it will speedily come to  
an end. An aggressive campaign there  
would compel the Spanish fleet now in  
Cuban waters to seek an engagement  
with the American fleet, or recross the  
Atlantic without delay; it is the surest  
way in the world to bring the two fleets  
together.It is possible the Spanish fleet might  
undertake to bombard some of the sea-  
coast cities. Such events are always  
to be looked for in war, but with Span-  
ish authority crushed in Cuba, and the  
island in the hands of the Americans,  
our own fleets can go in search of the  
Spaniards, even to the extent of cross-  
ing the ocean, and if not found a few  
Spanish cities could be laid waste by  
way of retaliation for any damage done  
American cities.Up to the present time the war on  
the part of the United States has, with  
the exception of Dewey's attack upon  
Manila, been conducted upon a defensive  
basis, rather than an offensive plan.  
From this time forth the war on our  
part should be made as aggressive as  
possible, and wherever a trip-hammer  
blow can be given Spain, it should be  
given. An aggressive war is what the  
people want, and the thing Spain  
dreads. Every vestige of Spanish au-  
thority should be stamped out of Cuba  
in the next month and a half. That  
done, Spain will be suing for peace at  
any price.

## WAR DEPARTMENT INDECISION

The Utah volunteers will go cheerfully  
wherever they are ordered, but it  
would be somewhat of a satisfaction if  
they knew for certain where they are  
going. The latest information is that  
they will go to the Philippines, but no  
man knows what, in this matter, the  
morrow may bring forth. The volun-  
teers have had orders changed on them  
so frequently that they would be fully  
justified in exclaiming: "Where are we  
at?"It must be confessed that there ap-  
pears to be a good deal of indecision  
on the part of those having in charge  
the plan of campaign for the army.  
While it is true that circumstances al-  
ter cases, still the circumstances should  
not be allowed to dictate everything;  
and circumstances, or something equally  
as capricious, have been con-  
trolling, apparently, the movements of  
the volunteers. Take the case of the  
Utah troops of cavalry. First it was  
to be mustered in, and then it was not,  
then it finally was. Then it was to be  
ordered to the Philippines, then to  
Cuba, and now again to the Philip-  
pines. All this simply means that there  
is great incompetence or carelessness  
somewhere in the war department. If  
the war goes on for any length of time  
and assumes large dimensions, it is  
more than likely the war department  
will have to be rid of much red tape  
and fuss and feuds. To the public  
eye it looks as though there were con-  
siderable incompetence and more indeci-  
sion in the department. Even a poor  
plan will and vigorously carried out is  
better than a good one carried out in-  
different and with indecision.

## BENICIA WANTS A GUN PLANT.

The San Francisco Call says a peti-  
tion has been addressed to the senators  
and representatives of California in  
congress requesting them to use their  
best efforts to bring about the estab-  
lishment of a gun-assembly plant for  
the Pacific coast at Benicia. The peti-  
tion has been signed not only by lead-  
ing citizens of Benicia, but by such  
representative organizations as the  
state board of trade, the chamber of  
commerce, the merchants' association  
and the manufacturers' association. It  
is, therefore, one that will compel at-  
tention by reason of the influential men  
who support it, and our delegation in  
congress can be safely counted on to  
do what they can to obtain a favorable  
consideration of it by the government.Such a plant would be a great  
thing for the Pacific coast, and much  
can be said in favor of its establish-  
ment. The reasons in this behalf urged  
by the Call are that "the Pacific coast  
frontage of the republic has ceased to  
be the back door of the nation. The  
whole trend of events of recent years  
toward the extension of wealth, com-  
merce and industry along these shores.  
It is reasonably certain that within a  
comparatively short time the principal  
energies of the nation will be exerted  
on the Pacific coast. Our country must  
prepare to meet the expanding commerce  
and naval and military energies of Rus-  
sia, Germany, Great Britain and Japan.  
The coast, equally with that of the  
Atlantic, will have to be defended, and  
for defensive purposes there will be re-  
quired every form of plant known to  
modern war."The product of a gun plant, and not  
the plant itself, would be that upon which  
the defense of the Pacific coast would  
depend, and in this respect it would be  
a matter of indifference where the  
plant was located. Does the necessity  
for a strong front on the Pacific coast  
require the establishment of a gun  
plant at Benicia? That is the question  
in this connection. The Pacific coast  
can never require so much armament  
as the Atlantic coast, for the very  
simple reason that there can never beanything like so many seaports upon  
it; nature has failed to provide the  
harbors. Had the armaments at Water-  
ville, N. Y., and Rockford, Ill., been  
working full time and to their full ca-  
pacity for the past few years, there  
would have been an ample supply of  
ordnance of all kinds on hand.Has California the iron and coal for  
supplying a gun plant with the raw  
material, or would these have to be  
carried there first? If the state has  
not, it would not be a business propo-  
sition to establish a gun plant there.  
The better plan would seem to be to  
enlarge the gun plants already estab-  
lished, if their capacity is inadequate to  
supply the demands of the govern-  
ment. Still, if the government contem-  
plates the establishment of any new  
gun plant, it should be glad to see one  
located at Benicia as well as anywhere  
else, always excepting Utah.

## "THE TRAITOR WITHIN THE GATES."

On one or two occasions The Herald  
has called special attention to the  
necessity of carefully watching all  
persons suspected of being spies, and  
suggested that it would be a good idea  
to expel all Spaniards from the coun-  
try. The Herald has pointed out what  
the spies were doing and shown that in  
all probability the blowing up of the  
powder mills in California and New  
Jersey was their work. The subject is  
an important one, one that attention  
cannot be drawn to too much by the  
press. The New York Tribune, under  
the heading "The Traitor Within the  
Gates," says:Liberty has its penalties, and this  
land of liberty is compelled to endure  
them today. Open doors and extended  
opportunities have brought a cosmopoli-  
tan population hither. As a rule, the
